## Summary

Computer Science Graduate and Software Development Engineer with a strong foundation in Java, SQL, and backend engineering. Experienced in building RESTful APIs, secure authentication systems, database-driven applications, and scalable full-stack solutions using Java, Node.js, Express.js, MongoDB, and MySQL. Skilled in AI/LLM integration and building reliable applications with a focus on performance, security, and scalability.

## Education

**Vellore Institute of Technology - VIT**, B. Tech in Computer Science and Engineering — Aug 2022 – May 2026

- CGPA: 8.12/10.0

## Skills

- **Programming Languages:** Java, Python, SQL, JavaScript
- **AI & GenAI:** Prompt Engineering, Gemini API Integration, LLM Integration
- **Web & Backend Technologies:** Node.js, Express.js, RESTful APIs, MongoDB, MySQL
- **Core CS Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Design
- **Tools & Platforms:** Git, Postman, AWS, Render, XAMPP
- **Relevant Coursework:** DBMS, Operating Systems, Computer Networks

## Work Experience

**MERN Stack Development Intern - Graphura India Private Limited** — Jul 2026 – Jul 2026

- Contributed to development of web application features using MongoDB, Express.js, React.js, and Node.js.
- Established the admin login API with JWT authentication, bcrypt password verification, and HTTP-only cookies.
- Collaborated on feature development using Git/GitHub, testing, debugging, and pull requests.

**Software Development Engineer (Backend) Intern - CNC WEB WORLD Technologies Pvt. Ltd** — Sep 2024 – Feb 2025

- Delivered the Geo-Attendance backend using Node.js, Express.js, and MongoDB, tested by 120+ users.
- Exposed RESTful APIs supporting attendance, authentication, and user-management workflows.
- Implemented token-based authentication and authorization mechanisms to secure backend operations and user access.
- Performed API testing, debugging, database integration, and deployment validation to ensure reliable application functionality.

## Projects

**Geo-Attendance System** — GitHub

- Engineered a geolocation-based attendance system with adaptive radius control and time-slot validation for multiple user roles.
- Deployed on Render and Google Cloud, tested by 120+ users, achieving sub-50ms latency for geofence validation.
- Secured 90%+ of application routes using JWT authentication with backend services powered by Node.js, Express.js, and MongoDB.

**MyLoanCredit.com – Loan Application Platform** — GitHub

- Developed a loan service platform supporting end-to-end backend workflows for real users.
- Designed and built RESTful APIs for loan processing and administrative approval workflows with structured database schemas.
- Configured cloud hosting, domain, and SSL (HTTPS) for secure production deployment.

**Hostel RoomMate Sync** — GitHub

- Architected a roommate and room allocation system for 1,000+ students, automating hostel workflows and reducing manual effort by 90%.
- Enforced JWT-based authentication and role-based access control, reducing unauthorized access by 80%.
- Managed 1,500+ MongoDB records using optimized queries and indexing.

## Certifications

- **MongoDB Associate Database Administrator** – MongoDB University
- **Blockchain Fundamentals and Developer** – IBM SkillsBuild / Cognitive Class

## Extracurricular Activities

- Ranked 738 among 1,773 participants in HackerRank Orchestrate (AI Agent Challenge).
- Top 30 Finalist in Blostem AI Hackathon.
